

THE MACHINE BEHIND SUCCESS

PestWest Electronics is proud to be the Founder of the Great Britain Women's Handball Supporters Club.

Handball is officially the fastest ball sport in the world with millions of participants and huge TV audiences. It is also the fastest growing sport in UK schools and the most popular worldwide sport for women. With London 2012 as a springboard, this exciting and dynamic team sport is set to capture the interest and imagination of the British public. PestWest Electronics are delighted to have become the founder member of the GB women's handball team Supporters Club after the team recently met the stringent requirements for participation at London 2012.

The GB Women's Handball team have come a long way since they formed in 2006.

Through active recruitment of athletes who met the criteria required - stealth, speed, skill and stamina - combined with the sheer dedication of the players who have relocated and played overseas to obtain the necessary experience, they have now turned into a team able to deliver a 'credible performance'. Thanks to their commitment, hard work and fighting spirit they are now scoring victories over higher ranked nations and Elite Top Division European clubs.

Daniela Edward, European Business Manager of PestWest Electronics says: 'We are very excited to have become founder members of the GB Women's Handball Supporter's Club and to be playing a part in their Olympic Dream'.

The sheer dedication, hard work, commitment and fighting spirit of PestWest very much mirrors that of the GB Women's Handball team which is why PestWest is committed to support the team on their journey to London 2012.
