

Biological Cleaning Materials

Bio-Gel is a range of biological products that are non-insecticidal, biodegradable and non-toxic compounds that contain no pathogens, are non-caustic, non-corrosive and are salmonella-free, utilizing natural materials that significantly enhance your sanitation program.

BIO-GEL

- Superior hard surface, multi purpose cleaner
- Superior, high sheer cling (thickened) formulation to adhere to active drains which makes it harder to flow out of the system
- Chlorine, Ammonia and pesticide resistant formulation
- Begins to immediately digest organic debris
- Fresh scent

Use this product in active drains, toilets, holding tanks, grease traps, septic systems.

Available in 1 32 oz. quart, 128 oz gallon jug, 6 gallon square pails and 55 gallon drums

BIO-GEL PRO FOAM

- High quality foaming cleaner for complete drain and void treatment
- Concentrated formulation for maximum impact on drain debris
- Balanced microbe formulation and foaming technology
- For use in hand held pressure foamers (like the Birchmeier Super Star foamer)
- Penetrates deep into voids for complete protection

Available in 8 ounce bettix bottles and 32 oz. quart refills

BIO-GEL PRO KLEEN

- Advanced floor cleaner and mop water additive
- Advanced surfactants blended with superior microbial technology makes this product the preferred product for restaurants, hospitality, institutional, and industrial applications
- Simply add it to mop water and let it go to work!
- Keeps mop heads fresher, longer
- Removes organic debris build-up that causes foul odors

This product can be ready to use, diluted and added to mop water

Available in 1 gallon (128 oz) jugs, 5 gal pails, 55 gallon drums

DUMPSTERGUARD

- Essential oil/bacterial blend that is designed specifically for use in harsh environments
- No scrubbing or rinsing required
- For Indoor and Outdoor Use
- Safe for use on all types of trash cans, bins, dumpsters and surrounding areas, high rise trash chutes, garbage trucks, compactors and more

Mix 1:1 - shake well before use

Available in gallons and 5 gallon pails

Professional Insect & Odor Management

PUTTING NATURE TO WORK FOR YOU

Professional Pest Control doesn't need to be difficult or laborious with the right products. These easy to use environmentally-friendly products provide cost effective, technician friendly solutions.

KLEER-OUT™, KEEP-OUT™

- Scientifically proven, non-toxic, patented technology that repels Fire Ants
- Designed specifically for the high temperature conditions of electrical equipment enclosures
- Timed Geraniol Vapor Release Technology for up to a year of preventative protection for the green plug and 30 days (high release) on the sachet pack

Use in enclosed areas to repel a multitude of insects. Primarily fire ants in 4' x 4' electrical boxes that cause millions of dollars worth of damage every year.

SCENT SAVOR

Non-insecticidal, environmentally friendly ULV formulation that successfully neutralizes odors, including smoke, fish, animal, rodent, trash and sewer odors.

Scent Savor is a highly effective, high quality product, which successfully neutralizes odors without damaging the environment.

ULV application of this proprietary blend of essential oils utilizes the ideal droplet size with the minimum volume to impact the malodor molecule and neutralize it.

Available in 34 oz ULV cartridges, 1 gallon (128 oz) jugs

Exodus ULV System

THE TOTAL SPACE SPRAYING SOLUTION FOR PEST MANAGEMENT DISINFECTION AND DEODORIZING PROGRAMS WITH A UNIQUE PROGRAMMABLE TIMER

Key benefits of the Exodus ULV system?

- **Optimum droplet size** – research has shown that for public health use, ULV applicators should produce droplets with a VMD (volume median diameter) of between 10 and 15 microns and that over 90% of these droplets should be under 50 microns. Independent tests proved that the Exodus unit produces droplets with a VMD of between 12.7 and 13.3 microns for oil-based products and 17.5 microns for water-based products and that over 98% of these droplets were under 40 microns.
- **Environmentally friendly** – because it operates at optimum droplet size, less ULV product is required to achieve the desired biological effect compared to other less efficient techniques.
- **Economical** – save money on product and treatment costs.
- **Sturdy construction** – the sturdy construction of the Exodus ensures a trouble free operation and reliable equipment in the field
- **Versatile** – the system can be used against a wide range of insects and micro-organisms in a variety of situations. Interchangeable bottles of products mean that there is a minimum waste of chemical.
- **Unique timer** – this can be set up during the day and operate “after hours” when personnel do not have to be present, saving both time and money. The timer enables very accurate dosing rates.
