About Us

Supporting you with a comprehensive range of professional flying insect management systems

PestWest products are significant part of several Leadership in Environmental and Energy Design (LEED) accreditation programs. Contact us for details.

It isn't magic that brings excellence to a company; excellence is the result of commitment and hard work by dedicated and experienced people. Whether we're talking about products or processes, no wizardry or easy formulas will solve the challenges of tomorrow, our people will.

PestWest cares about its employees and customers and understand that both are the foundation of our success.

We appreciate your continued support!

3-YEAR WARRANTY (EXCLUDING CONSUMABLES).

Insect Light Traps (Glue board systems)

Find us on:  Twitter  Facebook  Google+

High quality systems utilizing advanced glue board technology in ULTRA slim-line designs

EFFECTIVE

PestWest Quantum lamp uniquely designed for maximum efficacy. 40% more attractive to flies than BL350 Lamps

Patented Reflectobakt® sleeves for maximum catch and increased attractiveness to insects, significantly slows the drying of glue board

Large full size glue boards with specially UV resistant glue capture the smaller to largest insect intact for easy identification

DURABLE

Metal construction are UV resistant, giving you long lasting systems for reliable service

ENVIRONMENTAL RESPONSIBLE:

PestWest Quantum lamps are LEAD FREE, low Mercury (Hg)

ECONOMICAL

Large full size glue boards are conveniently interchangeable with most of the Mantis® line

VERSATILE

Available in white, black, customized color or stainless steel for different environments. Stainless steel systems are perfect for sensitive areas such as: food handling, processing and medical facilities.

Multiple glue boards options include: Classic premium full size black (come with each system) 60-day universal glue boards, in discreet black or high-definition (HD) white also fit in other systems in the market

Gray matrix boards for density counts are perfect for HACCP audits

Premium plastic glue boards inhibit mold and are ideal for high moisture areas

(See also page 25 - 27 for more information)

Mantis[®] 1x2 DISCRETION COVER

Transform your Mantis 1X2 with discretion cover

The discretion cover is an option to make any 1X2 (after 2012 models only) a discreet insect light trap suitable for any public area. Retro fits easily with no additional tool required. See below for easy install instructions:

DIMENSIONS

H: 8½" (22cm) W: 18½" (47cm) D: 2½" (12.7cm)

WEIGHT

2 lb (1 kg)

Always unplug system before attempting any maintenance or retro fit.

Remove bottom tray and carefully remove the front grill by slightly bending the tabs at the base of the grill outward from the punched holes and pull away.

Reverse the action with the new discretion cover.

Your new 1x2 discretion is ready to go to work.

Electronic Flying Insect Management Systems (Electrocutors)

Find us on:  Twitter  Facebook  Google+

EFFECTIVE

PestWest Quantum lamp uniquely designed for maximum efficacy. 40% more attractive to flies than BL350 Lamps. Unique transformer powerful yet reduces shattering of insects

DURABLE

All metal construction are UV resistant, giving you long lasting systems for reliable service.

SAFETY

Built in safety switch in the front grill, turns the system off if opened for user safety

Systems with a wrap around guard offer 360° protection

Catch tray with draft deflector keeps dead insects within the system

ENVIRONMENT FRIENDLY

PestWest Quantum lamps are LEAD FREE, low Mercury (Hg)

EASY TO USE

Tool free guard opening

"Power on" and "grid on" warning lights offer easy inspection at a distance

Spring loaded electrocution grid for easy cleaning

Not everyone who needs flying insect management has the same requirements.

Which flying insect management system would you expect to find in a rhinoceros pen at a zoo, or a booth on a toll road, a flour mill, a pharmaceutical manufacturing plant or any other specialty areas? This and many other requirements have been fulfilled by our experts, using a range of specially developed systems for very unique and sensitive environments.

Whether you require systems used in high moisture or potential dust or gas explosion environments, we have a system to suit and are always ready to advise and help you, on site, customizing your facility if necessary.

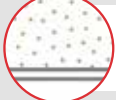

WHAT IS IP?

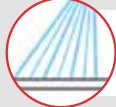

Find us on:  Twitter  Facebook  Google+

The IP Code: International Protection Marking; IEC Standard 60529, sometimes interpreted as Ingress Protection Marking, classifies and rates the degree of protection provided against intrusion into mechanical casings and electrical enclosures from body parts such as hands and fingers as well as dust and water.

IP RATING CHART

IP Ratings are represented by combining the first and second digits of the following columns. See examples below.

1ST DIGIT - SOLID		
DEGREE OF PROTECTION AGAINST SOLID OBJECTS		
	No Protection	0
	Protected against a solid object greater than 50 mm, such as a hand.	1
	Protected against a solid object greater than 12.5 mm, such as a finger.	2
	Protected against a solid object greater than 2.5 mm, such as a wire.	3
	Protected against a solid object greater than 1.0 mm, such as a tie strap.	4
	Dust protected. Prevents ingress of dust sufficient to cause harm.	5
	Dust tight. No ingress of dust.	6

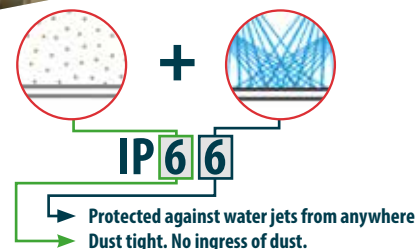

2ND DIGIT - LIQUID		
DEGREE OF PROTECTION AGAINST WATER		
	No Protection.	0
	Protected against water drops.	1
	Protected against water drops at a 15 degree angle.	2
	Protected against water spray at a 60 degree angle.	3
	Protected against water splashing from any angle.	4
	Protected against water jets from any angle.	5
	Protected against powerfully jetting water.	6
	Protected against the effects of temporary submersion in water (30 minutes at 3 feet).	7
	Protected against the effects of permanent submersion in water (up to 13 feet).	8

Stainless Steel
Product code:
125-000249
125-000167
(220v - Euro plug, special order)

Mantis® 1x2IP

Engineered for steam cleaned, hosed-down, high moisture and corrosive environments

- Designed to use in the high moisture areas of dairies, food processing facilities, cruise ships and industrial kitchens
- IP66 rating (EN60529:1992): no ingress of dust and protected against powerfully jetting water
- Professional grade of stainless steel: long life, unrivaled durability and superior corrosion resistance.

- 2x15W 18" T8 (1") Quantum Lamps: 180° coverage and optimum performance
- FEP shatter resistant coating, FDA Compliant for food contact: protection in glass-free zones
- Patented Reflectobakt sleeve: extending glue board life
- Utilizing a plastic glue board to eliminate warping moisture and mold
- Available in both 110v and 220v (Chameleon brand)

IP65

Protected against water jets from any angle.
Dust tight. No ingress of dust.

Mantis® 4x4 EX

Industrial system for potential dust or powder explosion environments

- Meets all safety legislation: FDA, USDA, UL1559 and European safety standard EN60335-2-59 for insect control equipment
- Independently tested: IP65 (Dust tight, protected against water jets), compliant with Euro-norm PREN 50281-1-1 for potentially explosive atmospheres and satisfies all current EMC standards and NEC Division Code Class II, Division II.

- Suitable for Zone 22 areas (atmosphere with combustible powder or dust), satisfying EN 50014:1994.
- 4x40W 24" T12 (1½") Quantum Lamps: 360° coverage and maximum performance
- Patented Reflectobakt® sleeve: extending glue board life
- Industrial double-sided glue board: provides 926sq. inch of protection
- Should be installed by a qualified electrician for sensitive environments.

Stainless Steel
Product code: 125-000160

Protected against powerfully jetting water.
Dust tight. No ingress of dust.

Chameleon[®] EXG

Protection in dust and gas explosive environments

- For use in petrochemical and pharmaceutical industries, distilleries, dairies, flour and sugar mills, and many others.
- Tested to be compliant with ATEX Directives 99/92/EC and 94/9/EC: suitable for use in Zones 22 & 21 (atmospheres with combustible dust or powder), Zones 2 and 1 (atmospheres with flammable gases or vapors), IP66 rating.
- Anti-corrosive construction: 304 brushed stainless steel, marine grade aluminum alloy, and a flameproof glass enclosure that prevents the transfer of a potential explosion to the surrounding area.

- 2x18W 24" T8 (1") Quantum Lamps: 180° coverage and optimum performance.
- FDA compliant FEP shatter resistant coating: protection in glass-free zones
- Adjustable glue board holders: allowing confined space placements as well as flexibility to move glue boards closer to the UVA light source
- Automatic switch off-on opening mechanism: simple & safe service
- Dual voltage ballast: suitable for 110v-220v environments
- **Should be installed by a qualified electrician for sensitive environments.**

Replacement Glue Boards

Find us on:  Twitter  Facebook  Google+

PestWest boards are double-sealed, front and back, to protect against moisture absorption, in steamy or high moisture environments such as kitchens etc.

This avoids the problem of the board warping with time. As a special glue is used on the PestWest boards, the glue stays on the board and not on your hands or clothes, if accidentally touched. Other cheaper, inferior boards often have wet glues that can be very messy to handle. While wet glues appear very sticky to the touch, many of them form a very thin hard skin on the glue surface when in contact with air or UV light. This can prevent small insects from being trapped. And that's just the glue.

We at PestWest have done extensive research and field testing to develop our high quality boards. They help to prevent warping, moisture absorption, and mold. The UV resistant glue and card matrix provide an essential tool that fit a wide variety of insect light trapping systems.

This means lower investments on your part in both inventory and labor costs. Need an SDS? Log on to: www.pestwest.com

Not all glue boards are the same.

Replacement Glue Boards and Reflectobakt®

Find us on: Twitter Facebook Google+

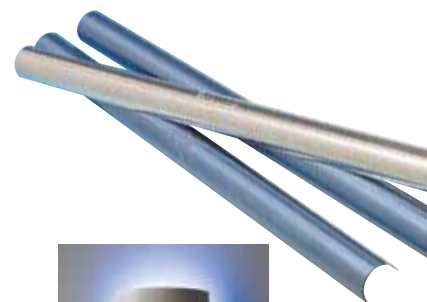

Over the years, the industry has used black as a standard color for their boards to conceal the catch. However, as pest management has evolved into a more sophisticated science its needs have changed and so have the board matrix types. The variety glue boards we offer are:

- **Classic premium glue boards (BOACHA850/135-000047)** for some of the largest catch surface areas in the market, enabling a greater catch per board. This board is interchangeable with most of the Mantis ILT systems
- Thicker than most boards on the market and with a coating to reduce warping and moisture absorption
- Lasts for 60 days in PestWest systems
- The glue boards are positioned so that they sit closer to the UV lamp than other models, providing a more rapid catch
- **Universal glue boards / (Black: BOAMAN853/135-000070 , White: BOAMANWT/135-000064)** are effective for 60 days (unless filled with insects) and are available in black or white and fit a wide variety of insect light traps in the market. See cross reference chart for complete reference in next page
- **Gray grid matrix glue boards / (BOAMAN867/135-000063)** for easy insect counting and monitoring. Boards can be retained to provide an accurate record for HACCP audits

- **Premium plastic glue boards (BOAMAN872/135-000048)** inhibit mold and are ideal for high moisture areas
- **4x4 glue boards (BOA4X4881/130-000053)** are industrial sized, 926sq. inch (23 3/4"19 1/2", 2-sided) glue boards for the Mantis® 4x4 and 4x4EX for extra protection
- **Chameleon EXG glue board (135-000050)** unique to this system
- **Translucent glue board for the Sunburst** lets light shine through the Sunburst systems. See images on the right. These also fit in the Naturale

Thin designs and longer lasting glue boards are made possible thanks to the **Reflectobakt®** sleeve available in T5 (5/8"), T8 (1") and T12 (1 1/2"). This sleeve shields the full-sized glue board from the drying effect of the UV light, thus making the systems more effective for longer periods of time.

NOTE: Don't throw the Reflectobakt sleeves away! Remove them from the spent lamps and place them on the fresh replacement lamps for optimal performance.

Helpful Hint

To get versatility out of our traps, use a Demi-Diamond pheromone glue board on top of the Mantis® glue boards. You don't lose any capture surface area AND you add value and have a multifunctional trap!

Replacement Universal Glue Boards

Find us on:  Twitter  Facebook  Google+

Upgraded
with
40%
more glue
coverage

The PestWest® Universal Glue Boards are available in both discreet black and "high definition" white and have been used in a wide variety of applications even OUTSIDE of the light trap.

Used around homes and restaurants as an insect monitor, around plumbing monitoring insect access spots

(scorpions, brown recluse etc) captures small invasive vertebrates, among many other uses. Certainly the preferred board for all non-chemical applications and is your watch-dog when you're not on the scene.

Directions for use are available in English and Spanish.

The PestWest Universal glue boards fits these models:

The Mad Hatter® Pollution Prevention Service is a cost-effective, responsible and convenient way of recycling smaller quantities of lamp waste while remaining compliant with regulations.

DID YOU KNOW?

California and Massachusetts, have a regulation requiring homeowners to recycle ALL fluorescent lamps. This includes small Compact Fluorescent Lamps (CFLs). Other states WILL follow.

Questions? call **866.476.7378** or log on to: **www.pestwest.com**

For specific recycle requirement in your state, go to:
<http://newmoa.org/prevention/mercury/lamprecycle/requirements.cfm#stateregs>

Mad Hatter® Lamp Recycling Box Program

Find us on: Twitter Facebook Google+

As a nation we know that Mercury is a toxic metal that is hazardous to both the environment and public health.

There are well over 500,000,000 spent lamps thrown into the dumpster every year. Not only is this illegal but it also causes more mercury contamination of the environment than any other consumer product.

The Mad Hatter® Lamp recycling service is a cost-effective and responsible pollution prevention service that is a simple to use box program, specifically designed to make recycling of your spent lamps easy. The program ensures that smaller quantities of spent fluorescent lamps are sent for recycling in accordance with federal, state and local regulations.

- One price includes everything you need - saving you hundreds of dollars on your recycling costs
- Convenience for smaller quantities of lamps - this program will save you money
- Ideal for facilities with storage limitations - no need to wait for large quantities of lamps to build up
- Allows you to purchase recycling services based on your individual needs

A single 4' fluorescent lamp has the potential to contaminate a 20-acre lake, with its mercury content beyond a safe level for drinking.

With one call to PestWest, the Mad Hatter® box, designed specially for smaller quantities of lamps, will be shipped to you to fill with spent lamps. This box comes complete with a return shipping label and complete instructions. Once the lamps are recycled a certificate of recycling will be mailed to you.

PRODUCT CODE	PRODUCT DESCRIPTION	NET UNIT	SHIPPING WEIGHT
PWE002 / 355-000002	(Medium box) 8.5" x 8.5" x 48" box holds 60-75 approx (based on T8/24")	Each	3.5 lb
PWE003 / 355-000003	(Large Box) 12" x 12" x 48" Large box holds 146 approx (based on T8/24")	Each	4 lb
PWE014 / 355-000005	(For 8' lamps) Holds 15 T12 8' lamps	Each	4.5 lb

Mercury is an essential component of fluorescent lights including 'Green Tip' and Compact Fluorescent (CFL) lamps - therefore all lamps must be managed correctly when they are removed from service.

SPENT FLUORESCENT LAMP RECYCLING IS AS EASY AS 1-2-3

An easy-to-use powder that reduces organic waste

- Developed to reduce organic waste in barns, coups, stalls, manure piles/heaps, houses, kennels, cages, litter, bedding, drain sewers, municipalities, towns and cities, waste water treatment plants (land and cruise ship based) and reduces foul odors from lagoons and retention ponds.
- Bacillus and Pseudomonas bacterial blends to digest inanimate mass.
- These bacteria have the exceptional targeted enzyme production of lipase, protease, amylase, cellulase, urease, pectinase, and chitinase, to speed the degradation and digestion of fats, carbohydrates, proteins, cellulose and starches.
- Formulated on a food-ready base accelerant to jump start the binary fission process.
- Available in 15 lb Bulk (Blue lid) & 30-8oz water soluble throw packs (Green Lid).

Designed to eliminate stains including urine, feces, blood & odors from cats, dogs and most other animals.

bacteria-based formula produces enzymes when it comes in contact with bio-based "messes" to target urine and feces and freshens with a light, pleasing fresh scent.

- Piddle Pal microbes bind to odor molecules. This is not a masking agent.
- Works on pet bedding, carpets, automobiles, public toilets, assisted living facilities and many, many more.

Piddle Pal™

- Great as a value add-on for every flea and tick treatment service
- Targeted urine, feces, odor destroyer.
- Tough on strong dog urine and the yellow, sticky residue.
- Freshens with a light, fresh pleasing scent.
- Safe to use on carpets, hard floors, furniture, fabrics and more.
- Flip top and ready to use container

Made in the U.S.A.

PestWest Inspection and Auditing tools:

- Easy to use
- Accurate results you can trust
- Saving your inspection time and cost dramatically

Also sold separately for training purposes

The CSI kit uses a specialty blue light in conjunction with orange goggles to contrast proteins from bed bugs, blood, feces, caste skins and eggs.

- Cutting your inspection time by hours, the blue-light is used to visualize latent signs and other physical infestation evidence, wear orange goggles which are included in the kit.
- The blue LED flashlight: made of Aerospace-grade aluminum tempered Pyrex Lens; w/ Mil-Spec Type III hard-anodized; Shock tested with a drop test of ten feet.
- Rechargeable battery: an estimated life of 300 hours without a significant decrease in power output.
- Bed bug life cycle disc: actual eggs, nymphs and both female and male adults can be viewed at a glance providing an illustration of bed bug life cycle.

Contrasting Specimen Inspection (CSI) Kit Professional Bed bug Detection

Kit includes:

- One (1) blue high intensity rechargeable flashlight
- One (1) pair of orange filter premium goggles
- One (1) pair of needle nose forceps
- Three (3) specimen 4x magnifiers
- Live hinge carrying case
- One (1) Bed Bug specimen life cycle ID disc
- Replacement components are readily available.

PestWest UV-A METER

UV lamps stop producing UV light long before their blue visible light declines

The PestWest UV-A Meter is easy-to-use, enabling you to monitor the condition and quality of UV lamps in any electronic flying insect light system so that you get the best results.

- The pocket size UV-A Meter is the perfect tool, Measuring ambient light first, then accurately measuring the UVA direct from your system.
- Great for new accounts that have existing systems (who knows when the lamps were changed last?) and monitoring systems throughout the year
- Standard UV lamps need to be changed annually. However, this may be more frequent if exposed to sensitive areas or natural sunlight.

AF DEMI DIAMOND® & PHEROMONE

Cost effective walk-by monitoring systems for Fruit fly, Indian Meal Moth or Webbing Clothes Moth.

- Cost effective: reusable station, no electricity consumed.
- Inspection at a glance: placed on wall mounted surface or underneath bar tops.
- 3 combo packs are ready to use (Fruit fly, IMM pheromones and Webbing CM pheromones)
- *Plodia* and *Esphestia* pheromone glue boards: slow release technology lasts between service intervals.
- 30 ml bait lure reservoir: at the bottom of station to add target pest lure.
- Add pheromone glue boards to any PestWest ILT glue board to increase attraction for target pest.
- Glue board colorations: provide contrasting, easy insect ID (moth glue boards feature a square grid pattern to assist trends analyses)
- Ideal for food processing plants and warehouses, hospitals, clinics, supermarkets, pet stores, restaurants, delis, convenience stores, schools, residential homes, and many more.

Shown upright

WINDOW WONDERS

Effectively and discreetly trapping both flying and crawling insects, the Window Wonder is ready to use (RTU).

Deploy Window Wonder traps to support integrated pest management (IPM) programs. Place upright for flies, horizontally for monitoring crawlers.

Used in and around restaurants, homes, and other environments, the Window Wonder serves as an exceptional monitoring device. Persistently monitor for pestiferous flies, moths, wasps, ants, cockroaches, beetles, weevils, firebrats, sliverfish, spiders, centipedes, millipedes, pillbugs, sowbugs, booklice, earwigs, crickets, springtails, stink bugs, and many others!

Lay it sideways for crawling insects

PRODUCT	PRODUCT CODE	NET UNIT	SHIPPING WEIGHT
Window Wonder	110-000590	Each - 45/CS	27 lb
Replacement glue boards	110-000591	12/PK-50/CS (black)	2 lb

Need Pheromone?

Indian Meal Moth (*ephestia/plodia*), Webbing Clothes moth (*Tineola*) are available, see page 45 for more details. Cluster Fly lures are also available in a "coaster" style media.

Cluster Fly Lure

A pure synomone attractant absorbed on a paper coaster sealed within a peel-able pouch provides easy placement within most passive or pitfall monitoring traps. With Cluster Fly Lure convert a passive trap to a very active Window Wonder trap!

PRODUCT	PRODUCT CODE	NET UNIT	SHIPPING WEIGHT
Cluster fly lure	110-000606	Each - 10 x discs	2 lb

Asian Lady Bug Lure

A powerful calling-behavior pheromone attractant absorbed on a paper coaster sealed within a peel-able pouch provides easy placement within most passive or pitfall monitoring traps. With Asian Lady Beetle Lure convert a passive trap to a very active Window Wonder trap!

PRODUCT	PRODUCT CODE	NET UNIT	SHIPPING WEIGHT
Asian Lady Bug Lure	110-000618	Each - 10 x discs	2 lb

iBook

Our unique
educational
ibook coming
soon!

**Whether you are a new or experienced
pest management professional,
PestWest's new iBook provides a
content rich, video-centric experience.**

Content from concepts in biology to insect physiology; IPM to public health; legal issues to insurance coverages; risk assessment to safety, and many others. The perfect quick refresher for busy PMPs!

Nemesis® QUATTRO

Mantis® Sirius

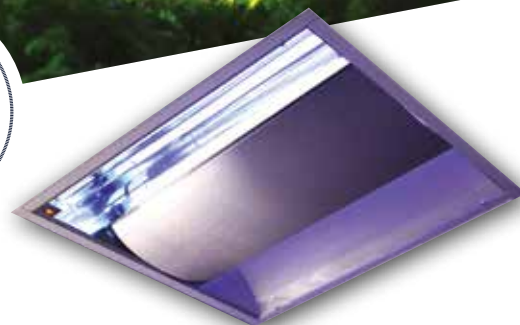

Higher performance - Lower consumption
- Reduced glass and mercury content

A range of environmentally responsible models offering innovative designs with highly efficient yet discreet fly control.

This range of expertly engineered flying insect management systems significantly reduce both environmental footprint and energy bills. They include a state-of-the-art electronic ballast which improves UV lamp performance, lowers electrical consumption and avoids the need for starters.

- 3 year warranty
- Fast and easy to service (no tools required and no starters to replace)
- 14 Watt Quantum® T5 shatter resistant lamps
- Electronic ballast
- Full metal construction
- Mantis® glue board and lamp type common throughout the line

ON-TOP PRO®

Mantis® VEGA

This image shows a single page of white paper with horizontal blue lines. The lines are evenly spaced and run across the width of the page, typical of notebook paper or a document template. There are no margins, text, or other markings on the page.
